

## Support and Training

We offer full certificated training for all your operational team to ensure they are confident and competent to use our machines.

Our friendly and knowledgeable customer care and engineering teams are on hand to support you when you need it.

A full range of maintenance validation packages are available to be tailored to the needs of your organisation.

## Let's raise the bar together - aiming for higher industry standards

The Kluge & Fielitz machines are compliant with the MDD and MDR, along with the standard BS EN ISO 15883 Parts 1, 5 & 7. BES are also providing a decontamination health check and road map to compliance for your service.

Depending on your equipment, our decontamination health check can include:

- Validation of processes and equipment
- Risk assessment recommendations to help mitigate risks
- Support with a road map to compliance including upgrade and chemical options

# Why Choose K&F?

Kluge & Fielitz offer a range of Washer-Disinfectors for community equipment, delivering an automated, cost-effective solution for cleaning and disinfecting a wide range of medical devices including wheelchairs, hoists, bed frames and commodes.

The company's founders, Torsten Kluge and Volker Fielitz, bring a wealth of expertise in the development, production and manufacturing of cleaning and disinfection systems for hospitals, community equipment services and decontamination departments.

KF300

### Compliant Machines

Complies with the Medical Device Regulation class IIa, meeting BS EN ISO 15883 Parts 1,5 and 7.

### Cost Savings

Saves costs in relation to time spent, energy, staffing, equipment replacement in comparison to manual washing.

### Time Savings

Equipment can be processed rapidly compared to the longer time it takes to undertake manual cleaning.

### Peace of Mind

Effective, repeatable cleaning and disinfecting cycles ensure your equipment is reliably safe to reissue.

## K&F Range

**KF200**  
WASHER  
DISINFECTOR
